Highlights

- System Development & Integration
- Problem-Solving & Analytical Skills
- Test Case Design & Execution
- Financial Systems & Payment Processing
- Software Testing Lifecycle (STLC)
- Agile Methodologies

Education

Bachelor of Science: Business Administration and Information Systems - 2024 Addis Ababa University (AAU), Addis Ababa

CGPA: Above 3

Exit Exam: 62%

Certifications

- ▶ African to Silicon Valley (A2SV) (Competitive Computer Programming of Data Science and Algorithm)
- ▶ Python Data Science & Analytics - (certification)
- ▶ Life Skill training - (training on life skill)
- ▶ Abrehot Library - (certificate for volunteering)

Experience

SYSTEM DEVELOPER & QA LEAD (KIYAEQUB.COM) - ADDIS ABABA

- Led the design, development, and testing of a modern Equb (traditional savings) system, including a sophisticated administrative dashboard and client-facing mobile application.
- Developed and executed comprehensive test plans and test cases for functionality, usability, performance, and security across web and mobile platforms.
- Managed the full cycle of payment system integration testing, ensuring accuracy and reliability of financial transactions within the Equb system.
- Identified, documented, and tracked software defects using systematic approaches, collaborating with development efforts to ensure timely resolution and system stability.
- Oversaw the system's operational aspects, including user management and live payment monitoring, gaining practical experience in financial system administration.

SOFT SKILLS

- Hard working
- Excellent problem solving skill
- Creativity and innovation
- Good team player
- Time Management
- Communication
- Attention to detail
- Always curious in learning new thing
